

First name:	Surname:	Brief overview of your background and experience in this SIG subject matter: (maximum 150 words)	What motivated you to put yourself forward for election to the APM Planning, Monitoring and Control SIG committee? (maximum 150 words)	What qualities, skills and experience do you think you'll bring to the APM Planning, Monitoring and Control SIG committee? (maximum 150 words)
Jay	Armstrong	Worked in the management consulting industry for 17 years with a focus on project controls on major projects in Australia, Canada and the UK.	Passionate interest in how projects are delivered; enjoy engaging and connecting with the PM community to improve practices and share learnings. Enjoy exploring emerging trends and practices and exploring how they might influence the profession moving forward.	I bring a practical but people centric approach to project controls and management; the pace of change is accelerating and our ways of working will continue to evolve and change but ultimately it is people that deliver projects.
Stephen	Baker	I am currently a freelance project / programme planner, with approximately a decade's worth of experience in the field. I have worked mainly in the Finance and IT sectors, both public and private. Organisations include Lloyds Bank, Hewlett Packard, Ministry of Justice, Ofcom, the BBC, and Steria. Prior to my career in Planning, my career was in IT development with 4 years at the Alliance and Leicester (now Santander) and 8 years for the IT consultancy Admiral Computing, which merged with CMG, and then with Logica. I came across the SIG via the excellent book "Planning, Scheduling, Monitoring and Control". And following up my interest in the group started attending SIG meetings five years ago. Please check out my LinkedIn	Having attended meetings over the last five years my main contribution so far has been a prototype software tool relating to a previous maturity assessment framework, which is unlikely to see much use! I would like to be able to contribute something more practical via the opportunity to serve on the committee. The group benefits from strong representation from the Engineering and Construction sectors. Coming from a mainly Finance / IT background, and with a few Agile qualifications, I would hope I might be	I believe the following factors support my candidacy to serve on the committee: (1) My planning background with a decade's worth of professional experience. (2) My sector experience in Finance and IT, strengthening the representation of those sectors. (3) The APM champions its own professional qualifications as a means of professional development. I have first hand experience of this having

		profile for further professional details and do feel free to connect, if we're not already connected! <a href="https://www.linkedin.com/in/PlannerStephenBaker/">https://www.linkedin.com/in/PlannerStephenBaker/</a>	able to bring a complementary perspective, where appropriate.	taken 13 professional qualifications (including APMG, AXELOS, Microsoft and BCS) relevant to Planning in the last 4 years.
Scot	Butcher	30+ years working in PM and PC. Extensive experience in Project Controls in defence (especially in EVM), resulting in a number of years as the head of project controls for the UK submarine enterprise. Member of PMC SIG for 5+ years.	As a daily user of PC, I am aware that this skill set is constantly moving. I originally joined the SIG to learn more and to impart my experiences gained in major defence programmes. As a committee member, I will hopefully be able to better influence the future direction of travel of PC both in the UK and across the world.	- Earned Value Management - Introduction of PC into large organisations - Leadership of PC in large organisations - Contracting for project controls
Ewan	Glen	Having worked in project and programmes for nearly 30 years I've spent the last 20 years delivering consulting roles that revolve around delivering or establishing robust planning, monitoring & control practices.	I've been involved with the SIG, either as part of the committee or more generally, for a while. I continue to enjoy working with the profession to share good ideas, helping building the knowledge around the PMC functions.	I love working with like minded people, sharing the lessons I've picked up on the way and learning from others. I've experience of projects from small delivery to multi-£Bn, all of which I'll bring with me to the SIG.
Stephen	Granville	I am currently working on a research project on digitalization of construction project. Prior to this time, as an effective engineering and project management practitioner with a demonstrated history of successfully planning, monitoring, control and delivering portfolio of projects in the construction industry and built environment, I have had the opportunity to be involved with project controls over a number of years on various major	As an active APM Planning, Monitoring and Control Specific Interest Group Committee member, I want to continue to serve and to support the work of APM in our Specific Interest Group. I am passionate about making a positive difference and I strongly believe that volunteering will enable me to contribute to our prestigious	I am an enthusiastic, pro-active and friendly individual; highly motivated and passionate about learning. I am an experienced team leader driven by the values of integrity, consistency, dedication and service. I am available to put to use my

		highways renewal and improvement projects for a wide range of employers and clients. This I enjoyed doing and also working with the team and stakeholders.	Association APM, providing the platform to work with others to achieve APM goals and gain a variety of new skills	skills for the benefit of our Specific Interest Group and APM at large
David	Hamblett	Starting as an apprentice in Mechanical engineering I moved into managing projects early in my career. I have since had the pleasure to work in a huge variety of industries from manufacturing and automotive engineering, through to the built environment on buildings, highways, railways, and Energy projects, specialising now in Project Controls. Most recently I have held senior project controls and project planning roles with National Highways as Head of Planning for CIP, and prior to that as the project controls lead for SDSC on the design of HS2 Euston Station. My current role with Arup allows me to develop the firms offering in the planning and controls space to grow their business both internally and externally, ensuring our important sustainability work is well planned, managed and delivered on major schemes around the world.	I am motivated to offer something back to the community both those who work in planning and controls roles, but also the project managers we support, who often have to cover all specialisms themselves on smaller projects often without good training and guidance and who we can help the most. I am involved in the training and development of both early careers staff, junior staff in our function and with the training of project managers in our business to upskill in the benefits of good planning and controls, The SIG would give me a chance to continue this work supporting the wider APM community and sharing learning and good practice, influencing the better delivery of projects.	I have a solid grounding in the project management having worked as a PM, Project leader, Planner, PCM & Head of Planning through my career, The ability to understand the underlying issues, look for creative solutions and to communicate these in a way that is understood by the audience has been key in my progression, as has the ability to stand back to consider see differing points of view, compromise where appropriate and where to stand firm to uphold standards. I have a passion for the benefits good quality project controls can offer a project when at an appropriate level for the project being considered, and for the opportunity the digital transformation the industry is undergoing can offer our

				discipline if well delivered. I will drive for progress in the SIG through continuous improvement.
Stephen	Hardy	I have over 15 years' experience delivering complex large scale transformation portfolios, programmes and projects across the financial services and market data providers.	Since joining the APM I've been looking for an opportunity to play a more active role within the APM, its branches and the various specific interest groups. I'm looking to help shape the future of the APM and the project management profession by sharing what I have learnt from 15 years in the industry and look forward to learning more from other like-minded project professionals.	I have an in-depth understanding of the various Project Management methodologies, the challenges faced by senior management and delivery teams and industry best practices for ensuring projects are delivered on time, within budget and to agreed levels of quality. As a project management professional, I have experience across the full spectrum of project management activities and responsibilities from Strategy, Governance, Execution and Capabilities that help deliver change from start to finish; planning, resourcing, finances, risk, change control, stakeholder management, quality assurance, Management reporting and everything in between.
Keith	Haward	45 years experience in Project Controls in Construction. Joined SIG in 2012.	Been on SIG committee for a number of years. Been co-chair for last 2 years.	45 years experience in Project Controls. Experience as a

			Enjoy being part of the group and helping the volunteers deliver.	Director and also Chair of a charity. Been active member of the SIG for 10 years.
Edwina	Hayward	I have worked in project controls on a number of Defence projects over the last 20 years. My roles have included project management, risk management, scheduling, reporting, budgeting and earned value analysis across a number of Naval and Land projects. In addition I have undertaken a number of Integrated Baseline and Demonstration Reviews as well as maturity assessments across a number of projects. I led the P2M capability within BMT, helping to drive the internal company capability in this areas and well as assuring our work for clients.	I have been involved with APM over a number of years, being an active member of the working group that produced the APMs Risk and Earned Value Management Guide as well as being on the committees for the Risk and Planning, Monitoring and Controls SIGs.. I am keen to be involved with the professional body to help shape the way that project controls is undertaken in the future. I value the opportunity to exchange knowledge and experience with the SIG members and across the wider project controls community. I have valued being part of the SIG committee up to press and would welcome the opportunity to continue this going forward.	Having been involved with project controls over a number of years I feel that I have a lot of experience that can be shared. The ability to pass on lessons that I learned, ways to overcome issues, ways of showing people the benefits of using project controls to manage projects and different ways to approach things. I enjoy working with people from other industries and with other experience to share that information and to help provide guidance for others. I look forward to the opportunity to pass on the learning that I have had personally as well as a collective to shape the way that other use the skills in their own industries and careers.
Milla	Mazilu	I have been involved with the SIG for a number of years and I am currently leading the Project Data Analytics group. In work, I am leading on project	I am keen to continue supporting the SIG, sharing knowledge and experience,	I will bring a collaborative leadership and active

		data analytics and controls systems, which are aligned with the SIGs work.	and providing the Project Data Analytics group with direction.	negotiation style to the committee's work.
Iain	Morton	My current role sees me leading and managing a number of project professionals, with a range of experience within planning, monitoring and control. I provide portfolio management services for their work but for myself, I have been involved in the development and operation of complex multi-organisation schedules, as well as the design and implementation of project controls across both the public and private sector.	I have been on the SIG committee for the last year and would like to continue contributing toward the SIG.	I am keen to support and provide advice to the SIG. I have over 10 years' worth of experience across various sectors, which I can bring to the SIG. I have supported the authoring of the Senior Manager's Guide so have experience in how certain publications are developed.
Ricky	Osei	I currently work in my company's planning and project controls functions and have been involved in the PMC SIG for the past year. This includes contributing to meetings and taking on roles and responsibilities during meetings and working groups.	Been a proud member of the PMC SIG and I believe there's still more I can contribute. Just to mention a few, this includes an article to be published by the APM on the effects of COVID-19 on project controls. Also, keen on working in groups with the PMC SIG. I have also enjoyed working with fellow members and admire the committee members' leadership and commitment. Which to me is a big motivation and more so, learn from their enthusiasm	I am effective at multitasking, and able to communicate clearly and plan and organize objectives in an orderly manner. I love working as part of a team and contributing to the development of innovative systems and procedures. This can be evident from my membership within the past year on the committee. Moreover, I am confident, devoted and passionate about promoting the Planning, Monitoring and Control function.
